

# Round Metal Table & Garden Arch Assembly Instructions

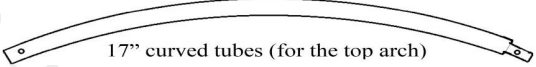

Please read all instructions carefully before use!

## Important Safety Cautions to Reduce the Risk of Personal Injury or Product/Property Damage:

- This product is not a toy and is intended only for decorative purposes with **lightweight** real or artificial plants, flowers, and other wedding arch decorations, or for decorative purposes in training of climbing plants. Do not use this product for any other purposes.
- Do not set or hang **heavy** objects on this **lightweight** product. If overloaded, it could collapse, causing product/property damage or possible personal injury.
- Keep this product and all its small parts out of the reach of children and pets.
- Do not stand or climb on this product. Do not use this product as a ladder.
- **Securely** attach and tighten all parts of this product before use.
- **Properly** secure the assembled arch to the floor by weight, cable, or other means or ground by weight, cable, burying the bottom horizontal tubes or other means first before decorating it. Free-standing installation is **not** recommended.

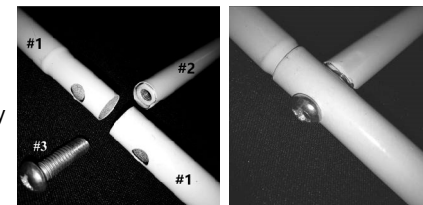

**Package Contents:** Please carefully check the contents against the parts table below.

Part No.	Descriptions	Quantities
1	 17" curved tubes (for the top arch)	28
2	 12" horizontal support tubes with screw-nuts inside both ends	15
3	20cm Screws	22
4	 Floor/Ground Support Bars	4
5	 Ground Stakes	4
6	Extended 25cm Screws for Floor/Ground Support Bars	8
7	Complimentary Screwdriver	1

## The basic joint structure:

Narrow end of #1 curved tube is inserted into the normal end of another #1 tube. Through the aligned holes, #3 screw is securely attached in #2 support tube.

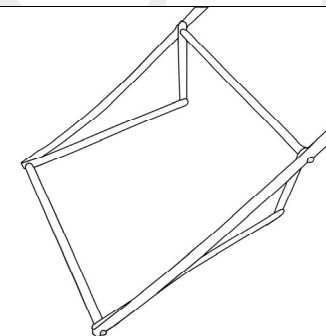

**Assembly Instructions:** Refer to the assembly drawing for the following steps. Ensure that the tubes point in the direction shown.

1. **Starting from the bottom right of the arch**, begin assembly by inserting a #1 curved tube into another #1 tube, and aligning the holes.
2. Insert a #3 screw into the aligned holes, attach a #2 tube as a crossbar and securely tighten the screw with a screwdriver.
3. Repeat Step One & Two and attach the opposite side of #2 tube to another pair of #1 tubes with the screw, forming the first rung of the ladder-shaped assembly.
4. Screw a #2 support tube at the bottom from both sides to complete the bottom assembly.
5. Add another "ladder step" by inserting 2 more #1 tubes into the top of previous assembly on either side of the "ladder" and screwing them together with an additional #2 support tube & 2 more #3 screws.
6. Repeat to add the remaining "ladder steps".
7. Screw a #2 support tube at the bottom from both sides using the included #6 25mm screws to complete the bottom assembly.
8. Tighten **all** the screws again to ensure that the completed arch is rigid.

Finally attach the floor/ground support bars to the round arch as shown.

Congratulations! Now the arch is ready for decorations. Make sure to first secure the arch to the tabletop/floor or ground properly – free standing installation is not recommended – before adding lightweight decorations.

For additional indoor/outdoor wedding or garden applications, this product can be reconfigured by removing 1 or more "links" to lower the arch.
